

LokSewa – Madhya Pradesh CSC

The Madhya Pradesh CSC was envisaged as a medium to improve the living standard of common man in the rural Madhya Pradesh, by enabling electronic delivery of information, knowledge, skills and services which they need the most.

An initiative of Department of Information Technology, Govt. of India, CSC is expected to reduce the time and cost involved in obtaining some of rural services such as agricultural/farm inputs & prices, weather forecast, public grievance redressal, government to citizen information & services and so on.

For a country like ours, which is big, introduction of digital medium is perceived to be the best available solution for better governance. CSC is the front end of a long and complex process of reaching better governance and other essential value-added services. CSC is important as it can become part of several other initiatives, which are aimed to connect all States and Union Territories. Existing digital services models are either limited in geographical reach or confined to just a few services or few locations. CSC, on the other hand, will be the first integrated model of government services and other value-added services.

Project Features

Count of Districts: 11

Active Centres: 1200

Total Agreements: 1990

Rollout Mandate: 2100

Services Offered
