### **CMS Computers earns CMMI Level 3 quality ratings**

**Mumbai, Maharashtra, May 19, 2014:** CMS Computers, one of pioneers and leaders in the Indian IT Services industry, has been appraised at Level 3 of Capability Maturity Model Integration (CMMI®), one of the highest quality standards for software companies across the world. The recognition from CMMI is a big feather in CMS's cap and it validates that the business processes and capability of CMS Computers are at par with global standards.

CMMI is the world's most trusted and esteemed improvement training/appraisal program, which is administered and marketed by US-based Carnegie Mellon University. The model is a proven method to evaluate performance management of a project, division, or an entire organization. This credential is expected to give a major boost to the business and credibility of CMS Computers among competitors. CMS will leverage the CMMI appraisal to meet the requirements of customers and improve the efficiency and productivity of the organisation.

Anil Menon, Chief Executive Officer, CMS Computers said, "We have yet again proved the CMS Computers is committed to best industry practices and giving high performance ratio to clients. Efficient project execution and process-driven approach have been the main drivers of CMS's growth since its inception. We are grateful to institutions like CMMI for recognizing our ability to manage projects with high level of maturity and predictability while keeping our client's needs in sync with our systems. "

This standard appraisal method was conducted by a CMMI Institute's authorized Lead Appraiser, wherein several projects and departments at CMS Computers were assessed from \_\_\_\_ 2013 to \_\_\_\_ 2013. CMMI Maturity level 3 is classified as "defined" which means the company has a well-defined processes and guidelines and are followed throughout the organization. The company focuses on re-usability and lay major emphasis on documentation.

Satish Jorapur, Business Head, e-Governance Solutions, added: "CMMI's assessment will definitely help improve systems, evaluate project outcomes, decide business objectives, reduce costs and, most importantly, attain customer satisfaction. It has given us a competitive edge in the industry and we will capitalize it while bidding for government and non-government contracts."

**About CMS Computers:**

**CMS Computers Ltd., founded as Computer Maintenance and Services Company in 1976, is one of the pioneers and leaders in the Indian IT solutions industry. CMS has been at the vanguard of the IT movement in the country with the sole objective to empower Indians with technological advancements.
